OBJECTIVE

Versatile Full Stack Web Developer with proven project management expertise, exceptional interpersonal skills, and client-facing experience. Seeking to join a collaborative company that values creativity and continuous professional development.

EXPERIENCE

Full Stack Web Developer | LeadFlask

2021 – Present | Columbus, Ohio

- Develops, tests, deploys, and maintains responsive, dynamic web applications using Tailwind, AlpineJS, Laravel, and Livewire
- Builds and integrates APIs to connect frontend interfaces with backend databases, ensuring seamless data flow and an optimal application performance
- Builds and optimizes back-end services and database structures using MySQL and Laravel
- Leverages AI-powered tools such as Claude and ChatGPT to accelerate development, debug code, and generate boilerplates efficiently, improving productivity and reducing turnaround time
- Collaborates with UI/UX designers to implement modern, mobile-first interfaces, reducing bounce rates and increasing engagement
- Integrated third-party APIs and services (e.g. payment gateways, cloud storage, email services) to expand application functionality
- Implemented secure authentication and authorization systems using bcrypt and OAuth2, ensuring reliability and maintainability of code
- Deployed applications to cloud platforms like AWS, Laravel Cloud, Forge, or Heroku using CI/CD pipelines with GitHub Actions, reducing downtime and streamlining updates
- Collaborates with cross-functional teams including UX/UI designers and QA engineers to deliver high-quality software in a timely manner
- Hosts client facing meetings to collaborate, deliver results, and resolve issues
- Leads development team in Agile development cycles, including sprint planning, daily standups, and retrospectives, contributing to an increase in team output
- Wrote and maintained technical documentation for code, APIs and infrastructure to support onboarding and knowledge sharing

Key Technologies: MySQL, Git, AWS, HTML5, CSS3, SASS, PHP, JavaScript (ES6+), AlpineJS, Livewire, Laravel, Tailwind, Bootstrap, Postman

Automotive Mechanic | J&A Automotive

2006 – 2021 | Pickerington, Ohio

- Performed routine maintenance and complex repairs on a wide range of vehicles, including engines, transmissions, brakes, exhaust systems, and electrical systems, ensuring safety and optimal performance
- Diagnosed mechanical and electrical issues using advanced diagnostic tools and repaired components with precision
- Conducted detailed inspections to ensure compliance with safety and manufacturer standards
- Maintained detailed records of repairs and services, contributing to an organized and efficient workflow
- Worked with customers to explain mechanical issues, repair processes, and maintenance schedules, providing transparent and clear recommendations to enhance customer satisfaction
- Stayed current on automotive technology advancements, attending training and certification programs to maintain ASE (Automotive Service Excellence) credentials
- Maintained shop tools and equipment, performing regular maintenance and calibration to ensure safety
- Assisted in inventory management by ordering and restocking parts and materials

EDUCATION

Project Managment: Specialization | Google

2024
